Website Brief

Marquee Social Marketing Services

Prepared for: Suryanarayan Pal

Objective

Create a stellar, high-performance website that positions Marquee as a premium boutique web studio. The site itself must be the strongest proof of capability. It should convert visitors into proposal requests and bookings. Mobile-first, fast, visually striking, and inspired by high-end studios such as basement.studio.

Design Direction

Take the confidence, performance focus, and visual restraint of basement.studio and elevate it for a service-business audience:

- Bold, large typography with strong hierarchy
- Dark or high-contrast base with one precise accent colour (matching the black & silver logo)
- Portfolio-first storytelling — show work before explaining services
- Subtle but refined motion (scroll-triggered reveals, smooth transitions)
- Mobile-first, extremely fast, and frictionless booking (WhatsApp + click-to-call on every page)
- The site should feel premium and precise, not noisy or “agency cliché”

Page Structure (3 Pages)

1. Home

Hero with large statement headline (e.g. “Websites that perform.”), short subhead, and primary CTAs. Selected Work highlights. What we do (compact). Testimonials. Final CTA strip.

2. Work

Full portfolio of live client sites with short context and outcomes. Process overview (Kickoff → Design → Build → Review → Launch). Capability notes.

3. Pricing & Contact

Two clear packages (Static and Dynamic). Contact details, enquiry form, and next steps.

Testimonials (Selected)

Ranga Shingte, Founder | Chairman, SWASYA Solutions

“Marquee delivered a clean, professional site that immediately strengthened our credibility. The process was straightforward and the final result supports how we present our safety culture work to clients.”

Chintan, Founder, Homepick

“They understood the artisanal nature of what we do and translated it into a website that feels authentic. Enquiries became easier and the site looks as good as our products.”

Founder, iCare Insurance

“Clear, fast, and focused on what our clients need. The site makes it simple for businesses to understand our services and get in touch — exactly what we asked for.”

Packages & Investment

Do not list actual numbers — use placeholders INR x (Static) and INR y (Dynamic).

	Static Website	Dynamic Website
Investment	INR x	INR y
Pages	Up to 6	Up to 6
Custom design, mobile-first, SSL, basic SEO	Yes	Yes
WhatsApp, call, Maps	Yes	Yes
Enquiry form + email alerts	—	Yes
Admin panel (edit text & images)	—	Yes
Blog / updates section	—	Yes
Add testimonials yourself	—	Yes
Content changes after launch	By us on request	By you anytime
Timeline	~3 weeks	~4 weeks

Static suits businesses whose content rarely changes. Dynamic suits those who want to publish updates, stories, or capture enquiries directly. Domain & hosting are separate (~INR 3,000–5,500/year at actuals, registered in client’s name). 50% advance, 50% before go-live. Two revision rounds included. 30-day bug-fix support.

Technical & Functional Requirements

- Fully responsive (mobile-first)
- Fast load times and clean code
- WhatsApp click-to-chat and click-to-call on every page
- Basic on-page SEO (titles, meta, alt text, sitemap)
- Google Analytics + Search Console ready
- Contact form with email notification
- Smooth, performant animations
- Ownership: Client owns the site, content, and domain/hosting logins on final payment

Tone of Voice

Confident, clear, and direct. No fluff. Speak like a studio that builds things that work. Short sentences. Specific benefits. Let the design and real client work do most of the heavy lifting.
